

TracVision® M-series

Premier satellite TV at sea!

The ultimate satellite TV solution for commercial applications.

Key Features and Attributes

- Ultra-high efficiency 45 cm, 60 cm, and 82 cm antennas using KVH's exclusive RingFire technology for the best reception and coverage available.
- Unsurpassed tracking and superior offshore performance in even the most demanding conditions.
- Proven, rugged, and reliable designs for trouble-free operation in the demanding marine environment.
- All TracVision M-series systems are HDTV-ready so you can watch the best programming TV has to offer.
- Positive satellite identification using integrated Digital Video Broadcast (DVB®) technology.
- Reception of leading satellite TV services around the globe for unmatched choices in entertainment.
- Support for multiple TVs and receivers, so everyone onboard can enjoy the TV programs they want.
- Completely automatic satellite switching with your remote control – a KVH exclusive!

TracVision M-series – the ultimate satellite TV solution for crew morale.

There's only one way to enjoy home theatre-quality television wherever you operate – satellite TV; and for the captain who insists on quality and reliability, there's only one way to get it – TracVision from KVH, the world's leading line of mobile satellite TV antenna systems.

Now with KVH's exclusive RingFire™ antenna technology and the best coverage and reception available today, TracVision provides you with a front row seat to the latest news, sports, movies, and more – all in crystal-clear, digital-quality television!

Using exclusive RingFire antenna technology and proprietary DVB tracking, KVH's TracVision M-series antennas provide TV programming farther offshore in all sea conditions with better reception and signal strength than other systems. They receive all of the leading satellite services around the world, so you'll be able to watch your favourite TV programs, almost anywhere you travel.*

And TracVision systems are built to commercial specifications and designed to be rugged and reliable, so they'll provide many years of trouble-free operation backed by KVH's worldwide Certified Support Network (CSN).

With TracVision, it's never been easier to reward your crews with hundreds of channels of satellite TV from high-powered TV services around the globe.

"We were impressed by TracVision's reliable performance, ability to find and track the required satellites virtually wherever our vessels travel, and its ease of use."

*KVH Industries does not have control over the programming or operation of the satellites or services that are covered in this document. The coverage maps for these satellites are provided as reference only and may change in the future or could be impacted by weather conditions. KVH provides no guarantees of satellite coverage, satellite availability, programming available on any specific satellite service, or compatibility of the TracVision system with new satellites that may be launched in the future. Please note that all Minimum EIRP values are average approximate figures that may vary according to actual transponder frequency and location.

†Requires HD-compatible receiver and TV.

Add satellite phone and Internet for the most complete solution!

KVH Industries is the world's leading provider of mobile satellite TV and communications solutions, with more than 150,000 mobile satellite antennas sold and fielded worldwide. With this track record of success, you can rely on KVH as your single source for maritime satellite TV systems, global communications via Inmarsat FleetBroadband, and broadband Internet access via our new TracPhone® V7 with mini-VSAT BroadbandSM service.
